Achievements

- **Graduation Project (Document Flow System):**

Analysis, Database Design and Programming using PHP and MySQL. This system aims to cancel sending and receiving documents manually. This System was made for An-najah National University.

- **Cars maintenance and Store System:**

Analysis, Database Design and Programming using PHP and MySQL. This system aims to deal with :

- 1- the store like: paying, selling, vouchers, bills, receipts , cash, profit/lost.
- 2- Cars maintenance like: when Car visit the location and need some maintenance, the needed operations are registered and putting ticks on the ready ones...etc.
- 3- Integration between the two sub-systems.

- **An-Najah National University Website:**

Programming using PHP and MySQL. This website is a presentation about the university ;history , study plans, news and events, videos and gallery...etc. Website + Control Panel (deal with the contents of the website →add, edit, delete, contents).

- **Right to Education Campaign of An-Najah National University:**

Analysis, Database Design and Programming using PHP and MySQL. This aims to improve that we have the right to education in Palestine.Website + Control Panel (deal with the contents of the website →add, edit, delete, contents).
