EDUCATION

2001– 2002 Department of Architecture and Building Science UNIVERSITY OF STRATHCLYDE
Glasgow, United Kingdom.

MSc. Computer Aided Building Design.

This unique specialty has been founded in response to the changing needs of the architectural practice. The University of Strathclyde is a pioneer to bring this expertise into academia.

This study has enabled me to explore a knowledge of particular techniques necessarily to take a leading role in the efficient and effective application of computers in practice.

It has also accompanied with a large amount of project work in the course which enhanced my understanding of different lines of thought related to the computer aided building design and the latest technological development of the field in architecture.

Consequently, I was able to develop my own approach where it is possible to promote the theory of architecture education skills and its practice.

1994 – 1999 An-Najah National University . Nablus - Palestine .

BSc. Architectural Engineering .

The study has provided me with the principal knowledge of architecture. It also has enabled me to design the Municipality of Jerusalem acknowledged by my examiners to be among the best projects ever seen.

According to Bilal Hammad, one of the leading Jordanian architects, the project was dazzling and embodied a great success in dealing with the theory and practice of architecture on a micro and macro scale.

The strategic site of the project, which is located in front of the main gate of the Holy City (Islamic Jerusalem), was carefully selected. The traditional style, which governs the Old City, was taken into consideration when the project is designed. The unity and harmony with the existing style was the project priority. What is more , The type of the designed administrative building attempted to enhance the relationship between the community and architecture. Therefore, **the project was given the honor first degree.**

1993 – 1994 Qadri Toukan Secondary School. Nablus – Palestine .

General Secondary School Certificate (Tawjihi).

WORK EXPERIENCE;

2005 – Present . full time , Teacher , Department of Building engineering , Faculty of engineering, An-Najah National University, Nablus, Palestine

2003 – Present . Part time , Teacher , Department of architectural engineering , Faculty of engineering , An-Najah National University, Nablus, Palestine

2003 – 2005 . Teacher , Department of Plastic art , Faculty of fine art , An-Najah National University, Nablus, Palestine

2003 – 2005 . Part time , Teacher , Department of architectural engineering , Faculty of engineering , An-Najah National University, Nablus, Palestine

Feb-june-2003 – Part time , Teacher , Department of Computer Science , **Al-Quds Open University ,** Nablus, Palestine

2007 – Present . Part time , Consultant(Design , management and supervision) of Omnya building (Commercial building) ,its more than 7500m²

2005 – 2007 . Part time , Consultant(Design , management and supervision) of Al-Nokhba building(residential building) ,its more than 6500m²

2007 -2008 - . Part time , Consultant for the Nablus Municipality in the Engineering Department.

2004 – 2006 . Part time, Design , management and supervision of Al-Hejaz building (residential building), its more than 6000m².

2000 – 2001 Al- Sadder Engineering Center in Nablus.

- Design of some private and public projects such as housing, commercial buildings, mosques and shopping centres.
- The participation in some architectural competitions such as ‘The Cultural Centre of Jenin’ and a martyrious monument in Nablus.
- Site-Engineer for some other building schemes carried out in Nablus. Interior designer of private houses including the building of fireplaces.
- Restoration and up-grading of an old building in *al-Yasminah* quarter in the Old Town of Nablus.

1999 – 2000 Future Office for Architecture & Interior Design in Nablus,

- Interior designer and site-supervisor of al-‘ūri exhibitions, Beit ‘ūr al-Tahta and el-Birah. The projects involved a variety of ideas in their design concept which demonstrate the use of different building construction materials. These have given the projects their architectural value.
- Restoration and revitalization of an old building carried the name ‘Saleem Afandi Restaurant’ in Old town of Nablus.
- Interior design and supervision of a number of shops in Nablus.

1999 – 2000 Centre of Computers in Nablus.

- An AutoCAD tutor.
